# Features of non chronological report ks2

**The Blow**  
Gray whales usually surface every 45 seconds as they swim, but will often stay under for 3 to 5 minutes when they are resting. If they have been down for 5 minutes they usually blow 5 times when they surface to replenish their oxygen supply. If they are frightened they can stay down for 30 minutes, hiding on the bottom or traveling great distances. Sometimes they dive and resurface 1/2 mile away. The blow or spout shoots nearly 12 feet high expelling 400 liters of air in a single blast.

**The Breach**  
The ultimate in whale sightings is a breach—when a whale launches as much as 3/4 of its body out of the water in a spectacular show of power and grace. Scientists aren't sure why whales breach. Possibly they do it to remove parasites, communicate with each other, or maybe it's just for fun. Gray whales aren't known for breaching nearly as often as their cousins, the humpback whales, but young Grays seem to be the most common breachers along the Oregon Coast.

**The Dive**  
A deep dive, also known as sounding or flaking, happens when a whale lifts its tail flukes out of the water. This helps propel the whale downward at a steep angle to the bottom, where they feed on small crustaceans. After the flukes disappear under the water, the turbulence of the dive will cause a circle of smooth water, known as a fluke-pot.

**The Spyhop**  
Whales have the largest brain of any animal on earth. They are very intelligent and curious, often seen "spyhopping," or lifting their heads above the surface of the water. They like to rise out of the water to get a better sense of their surroundings. Resident Gray whales have been known to spyhop regularly, especially when local tour boats are near. Behavior like this make us wonder if the whales enjoy watching us as much as we enjoy watching them!

**Other Species**  
Other whales we see are Minke, Humpback, Blue, and Sperm whales. Orcas, the largest of the dolphins, are also seen in Oregon.

All whale photos courtesy: Earth's Health, Oregon Department of Forestry, Oregon Dept.

**Watching Gray Whales**  
Studying the swimming and diving patterns of whales helps us to locate whales by watching their blow as they surface. The blow, or spout, is about 12' high.

**Swimming Pattern:** About 45 seconds (blow), 45 seconds (underwater), 300 to 400 yards (distance).

**Diving Pattern:** 3 to 5 minutes (underwater), 45 seconds (blow).

## What did the dinosaurs die out?

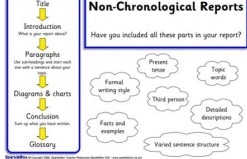

All dinosaurs in Earth died out about 65 million years ago. There are several theories as to why they died out. Some think it was because of a meteorite hitting the earth, others think it was because of a volcanic eruption, and some think it was because of a change in the climate.

Scientists are trying to discover what happened to the dinosaurs. Some think it was because of a meteorite hitting the earth, others think it was because of a volcanic eruption, and some think it was because of a change in the climate.

Most scientists agree that dinosaurs died out because of a meteorite. Some scientists think that volcanic eruptions caused the dinosaurs to die out. Others think that a change in the climate caused the dinosaurs to die out.

Dinosaurs were not the only group of animals to die out at that time. Some of the birds, reptiles, and mammals that lived at that time also died out. This was a mass extinction event.

Scientists will argue about what caused the dinosaurs to die out. They have different theories about why they died out. Some think it was because of a meteorite, others think it was because of a volcanic eruption, and some think it was because of a change in the climate.

## Marvellous Mars

**Introduction**  
Have you ever wanted to find out more about the Red Planet, Mars? If so, this is the report for you!

**Appearance**  
Mars is often called The Red Planet because of its colour. Interesting, it is a special mineral on the planet's surface that causes this colour. Mars' surface is covered in towering mountains and deep craters caused by crashing asteroids and meteorites.

**Size**  
Mars is the second smallest planet in our solar system. It is half the size of the Earth. However, because Mars is a desert planet it has the same amount of dry land as the Earth.

So a non-chronological relationship on Meerkats, for example, could give you an introduction, so some information on where they live, what they eat, as they are adapted to the environments and so on. There are many different examples of non-chronological relationships: A Non-Fiction Ticket Water Tourist Fleaflight, Information Poster (for example, like those you can see in a zoo) A e News report on video TV report on something in particular, Although they can take different forms, they have similar characteristics. This will be fantastic for my year 5 class.empty reply makes no sense to the end UserReport this resource! let us know if it violates our terms and conditions. It also includes examples of reports that children can use and highlight to practice identifying these features. Creative Commons "Sharealike" Select General Evaluation (no rating) Your score is necessary to reflect your happiness. It's nice to leave feedback. Something went wrong, try again later. Don't really what I was looking for, maybe share some content information texts for children Y4? The empty response makes no sense to the end to the examples that I was trying to connect to our predators' topic! Excellent \*\*\*\*\* The empty response makes no sense for the reply Diresempty Reply makes no sense for the end of the end of the response makes no sense for the end of the user. Our customer support team will examine your relationship and will be in touch. The teacher can mark the job and write suggestions, or children can be placed as a couple to change work to each other. Children therefore need to think about the layout of their relationship. Save Liquid Error (Product Line-Badge 92): Calculating results in 'Nan' (not a number)% Display Resolutions Poster English Checkout Securely using the preferred payment method this week, we are exploring non-chronological relationships. A teacher can encourage children to draw up a plan of how they would like them To watch children then produce their 'clean' relationships, writing their improved paragraphs and including captivating headers and images. Here are some of the main features of a non-chronological report. Can you identify any of these features in the examples of non-chronological reports below? Speak a few minutes to think about the following questions, then watch the video. Topic: is there something you would like to know more? A, what do you know already a lot? A, a hobby an animal is a place a significant person, a company or a company or a charity non-chronologically writing different types of text play / discussion / discussion non-chronological reports writing Of Different Types of Non-Chronological Text Writing Types Different Types of Non-Chronological Text Writing Different Types of Non-Chronological Text Reports Non-Chronological Writing Different Types of Text Play / Discussion / Discussion Reports non-chronological writing of different types of text Write non-chronological relationships writing different different types of text Topics and discussions My store is a mix of different subjects for all ages in primary school ... almost like a small mix of Resources! I specialize in the production of PowerPoint presentations on a variety of topics including: game scripts, ancient Greece, Harry Potter, Tudors and Pirates. Non-chronological means no particular order. New resources are added enough regularly. Children will spend some time marking features on different relationships and comparing how they are established. For example, you could read a report on Meerkats if you want to know more about them. They must think of all the above features and What they would like to include. The next step will be for children to choose or receive a search topic. It can be given a Spider Spider diagram The following, on which to take notes: children will therefore have to draw up each paragraph of their relationship. Leachers therefore encourage to modify them and improve their writing. Concentrate on lessons and lessons lessons with a package aim to be taught in a week or more with some worksheets and activities included. All reviews and feedback are welcome! Have a good time! Last updated 25 February 2019Contains A PowerPoint who looks at what a non-chronological relationship is not tired by the characteristics of non-chronological reports. People write reports to store and organize information about something, something.
